20 cm deep for cooling bottles with ice cubes

The ICE WELL with a depth of 20 cm is designed for cooling bottles. The entire well is filled with ice cubes. The well is equipped with a drainage tap and thus offers the possibility to drain the entire contents (melted ice = water) after use. A bucket can be placed under the table when the shut-off valve gets opened. In addition, a 1/1 GN grid basket can be used in the ice well. In this way the not yet melted ice can be easily removed. The ice well is available in two sizes (80 x 80 cm and 50 x 80 cm) for a buffet depth of 80 cm. The tub can be closed with the supplied insert plates (two pieces each) so that the table top can be used as a shelf.

(Dimensions: LxWxH 80x80x92cm)  
Item No.: 80092
